PND Engineers, Inc., is pleased to announce the following new hires in its Anchorage office.

Cameron Brailey, EIT, has joined PND as a staff civil engineer. Cameron has a strong background in construction, hydrology and hydraulics. He is a lifelong Alaskan and a 2016 graduate of Northern Arizona University. He brings skills including bathymetric survey and computer modeling and is a trained swift water rescue technician.

Diana Linder, EIT, has joined the team as a staff structural engineer. Diana is a December 2018 graduate of Mississippi State University with a bachelor's degree in civil engineering. Originally from Minnesota, Diana also has a background in water resources and environmental research. As an undergraduate student, she was president of her ASCE student chapter and volunteered with an organization to promote STEM careers with middle school girls. She participated on the Mississippi State Concrete Canoe Team for two years; both teams went on to win first place in the regional competitions and advance to the 30th and 31st Annual ASCE National Concrete Canoe Competitions.

Lifelong Alaskan **Elizabeth Swan, EIT**, a staff structural engineer, received her Bachelor of Science in civil engineering from the University of Alaska Anchorage in spring 2018. She is currently splitting her time between PND's Anchorage and Palmer offices while working toward her master's degree. Prior to joining PND, she interned for two summers with the Alaska Department of Transportation & Public Facilities Bridge Section, gaining experience with structures by assisting on bridge inspections statewide.

Jane Hemstreet has joined PND Engineers, Inc. in Anchorage as our front desk administrative assistant. Jane is originally from Dallas, Texas, but has called Anchorage her home for about 10 years. She comes to PND from Wells Fargo, where she worked most recently with the home mortgage team and brings previous experience as an auto claims adjuster. Jane volunteers with local nonprofits including Beans Café, Children's Lunchbox, and Habitat for Humanity, and helps raise funds for various causes through participation in charity runs.

PND Engineers, Inc., founded in Anchorage in 1979, is a full-service engineering firm that provides civil, structural, arctic, marine, geotechnical, and coastal engineering; hydrology; surveying; environmental permitting; project management; and construction inspection services for a wide range of projects. The firm has offices in Anchorage, Juneau, and Palmer, Alaska; Seattle, Washington; Houston, Texas; and Vancouver, BC.
