## **Coffman Engineers' Anchorage Engineer Earns Professional Licenses**

**ANCHORAGE, Alaska** (December 6, 2021) – Coffman Engineers (Coffman) is pleased to announce Mary Dempsey's achievement on earning Professional Civil Engineering Licenses in Alaska and California.

To become professionally licensed, engineers must complete a college degree, work under a Professional Engineer for at least four years, pass fundamental competency exams, and earn a license from the state licensure board.

Mary graduated from the University of Florida with a degree in Chemical Engineering and holds a Project Management Professional (PMP) certification. Before joining Coffman in 2020, Mary worked in civil land development in Washington planning neighborhoods, stormwater systems, and AutoCAD Civil3D skills. She returned to Anchorage to lead a ConocoPhillips grind and truck dump project.

At Coffman, Mary leads industrial projects in the project management department. Mary is also part of Alyeska Pipeline Service Company's Systems Integrity team working on a facility corrosion integrity monitoring project for Coffman and Alyeska.

### **About Coffman Engineers**

Since 1979, Coffman Engineers has added staff and expanded into dozens of service offerings, but the commitment to innovative work and enduring relationships remains unchanged. Coffman offers deep and scalable multidiscipline engineering services including civil, structural, mechanical, electrical, fire protection, and other specialties. Coffman's 600 employees from 19 offices across the US are committed to clients and the team effort it takes to build a better world.
